

Eleftherios Zacharakis
Technical Account Manager
International **WELL** Building Institute

Leveraging planetary och human sustainability in buildings

Outline

- Key **differences** of implementing **WELL Certification** to advance human sustainability in the real estate.
- Celebrating the first successful **WELL case studies** in Greece.

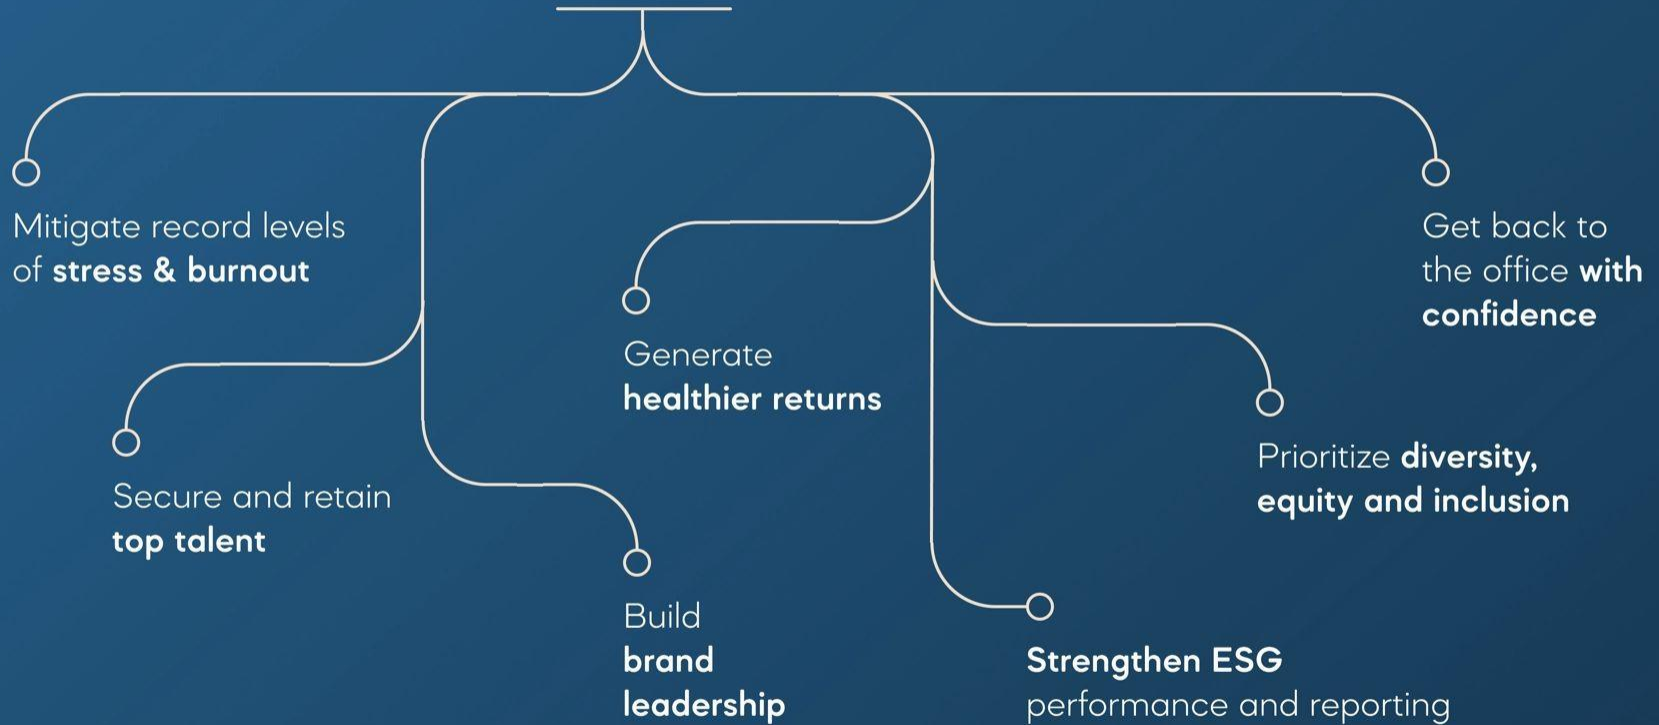

A close-up photograph of a woman's eye peering through the green leaves of a plant. The eye is light-colored and looking directly at the camera. The leaves are vibrant green and have a prominent vein structure. The background is a soft, out-of-focus light green.

Key differences in a
WELL certified building
with a common one

WELL is an evidence-based roadmap for supporting the health & well-being of your people and your organization.

WELL enhances tenant satisfaction.

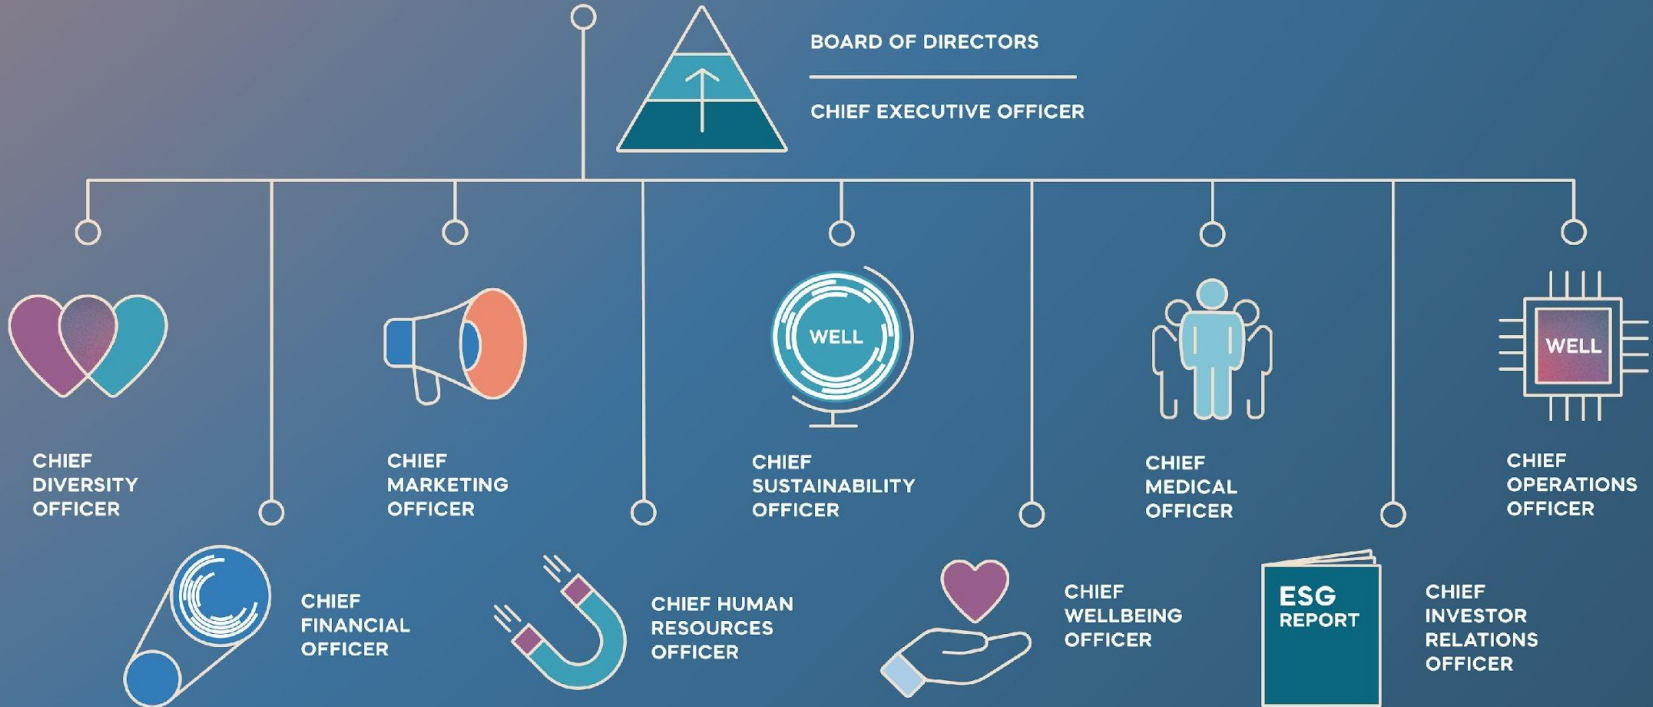

A 2022 study found that WELL Certification improved overall **occupant satisfaction** by nearly **30%**, as well as **occupant perceived well-being scores** by **26%**, reported mental health by 10% and productivity by 10 median points.

A study in [Landscape and Urban Planning](#) found offices with higher green index scores yielded **rent premiums up to 7.8%**. Similarly, a [Building and Environment](#) study found that offices with high levels of daylight saw a **5-6% rent premium**.

THE WELL PROGRAM

Unite your leadership around a shared vision for health.
Execute against it to drive results for your business.
