

IMO2021 compliance and standardization of vessel IT

When using KeepUp@Sea

Thomas Busk Jacobsen

28.09.2020

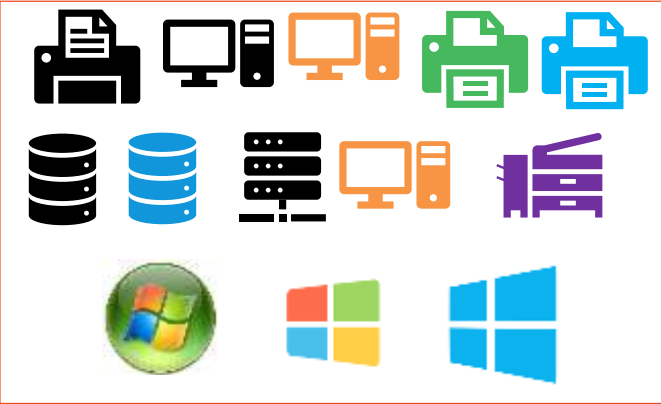

Agenda

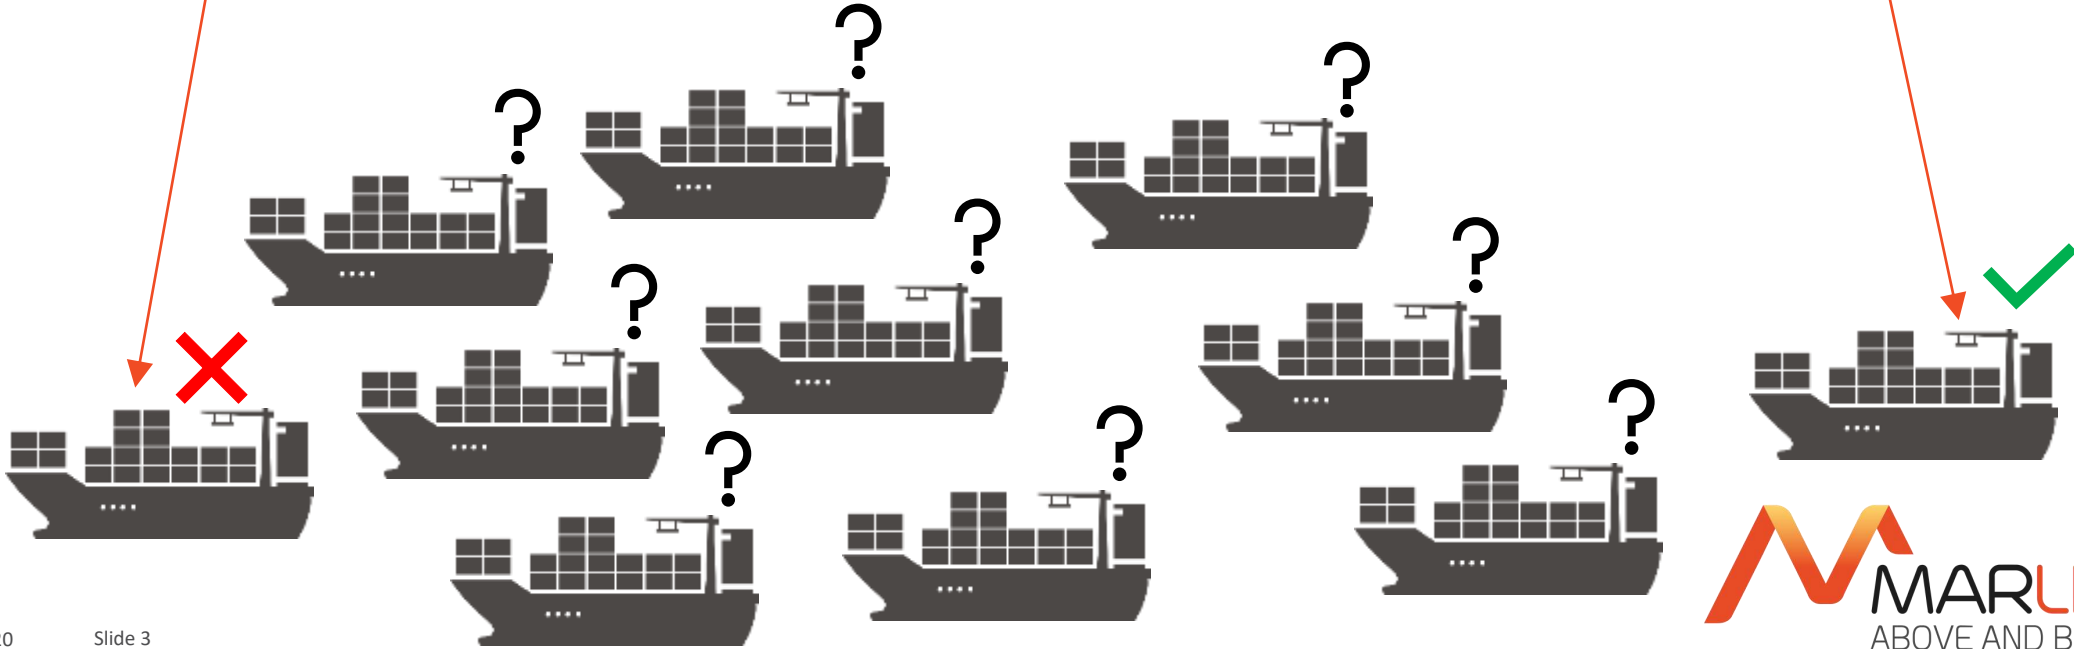

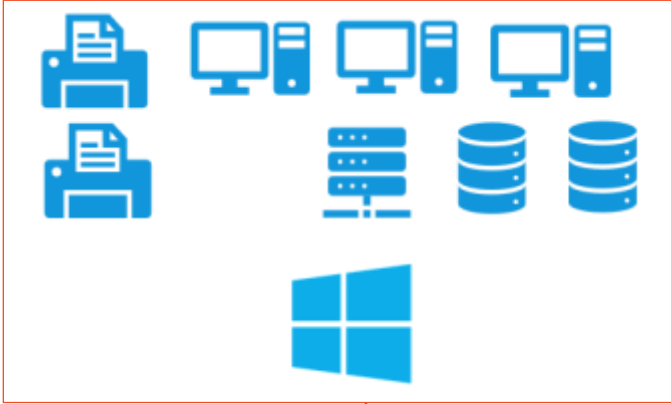

- IMO2021, adapting current onboard situation to become compliant
- Use-cases
 - Identifying cyber security vulnerabilities
 - How to keep audit trails
 - Software status reporting functionalities
 - How to ensure all computers receive risk mitigating updates
 - If time permits: how to centrally manage/mitigate vulnerabilities across many vessels/all computers from shore, benefiting from the standardization and automation implemented

Common fleet situation

Oldest existing IT-solution

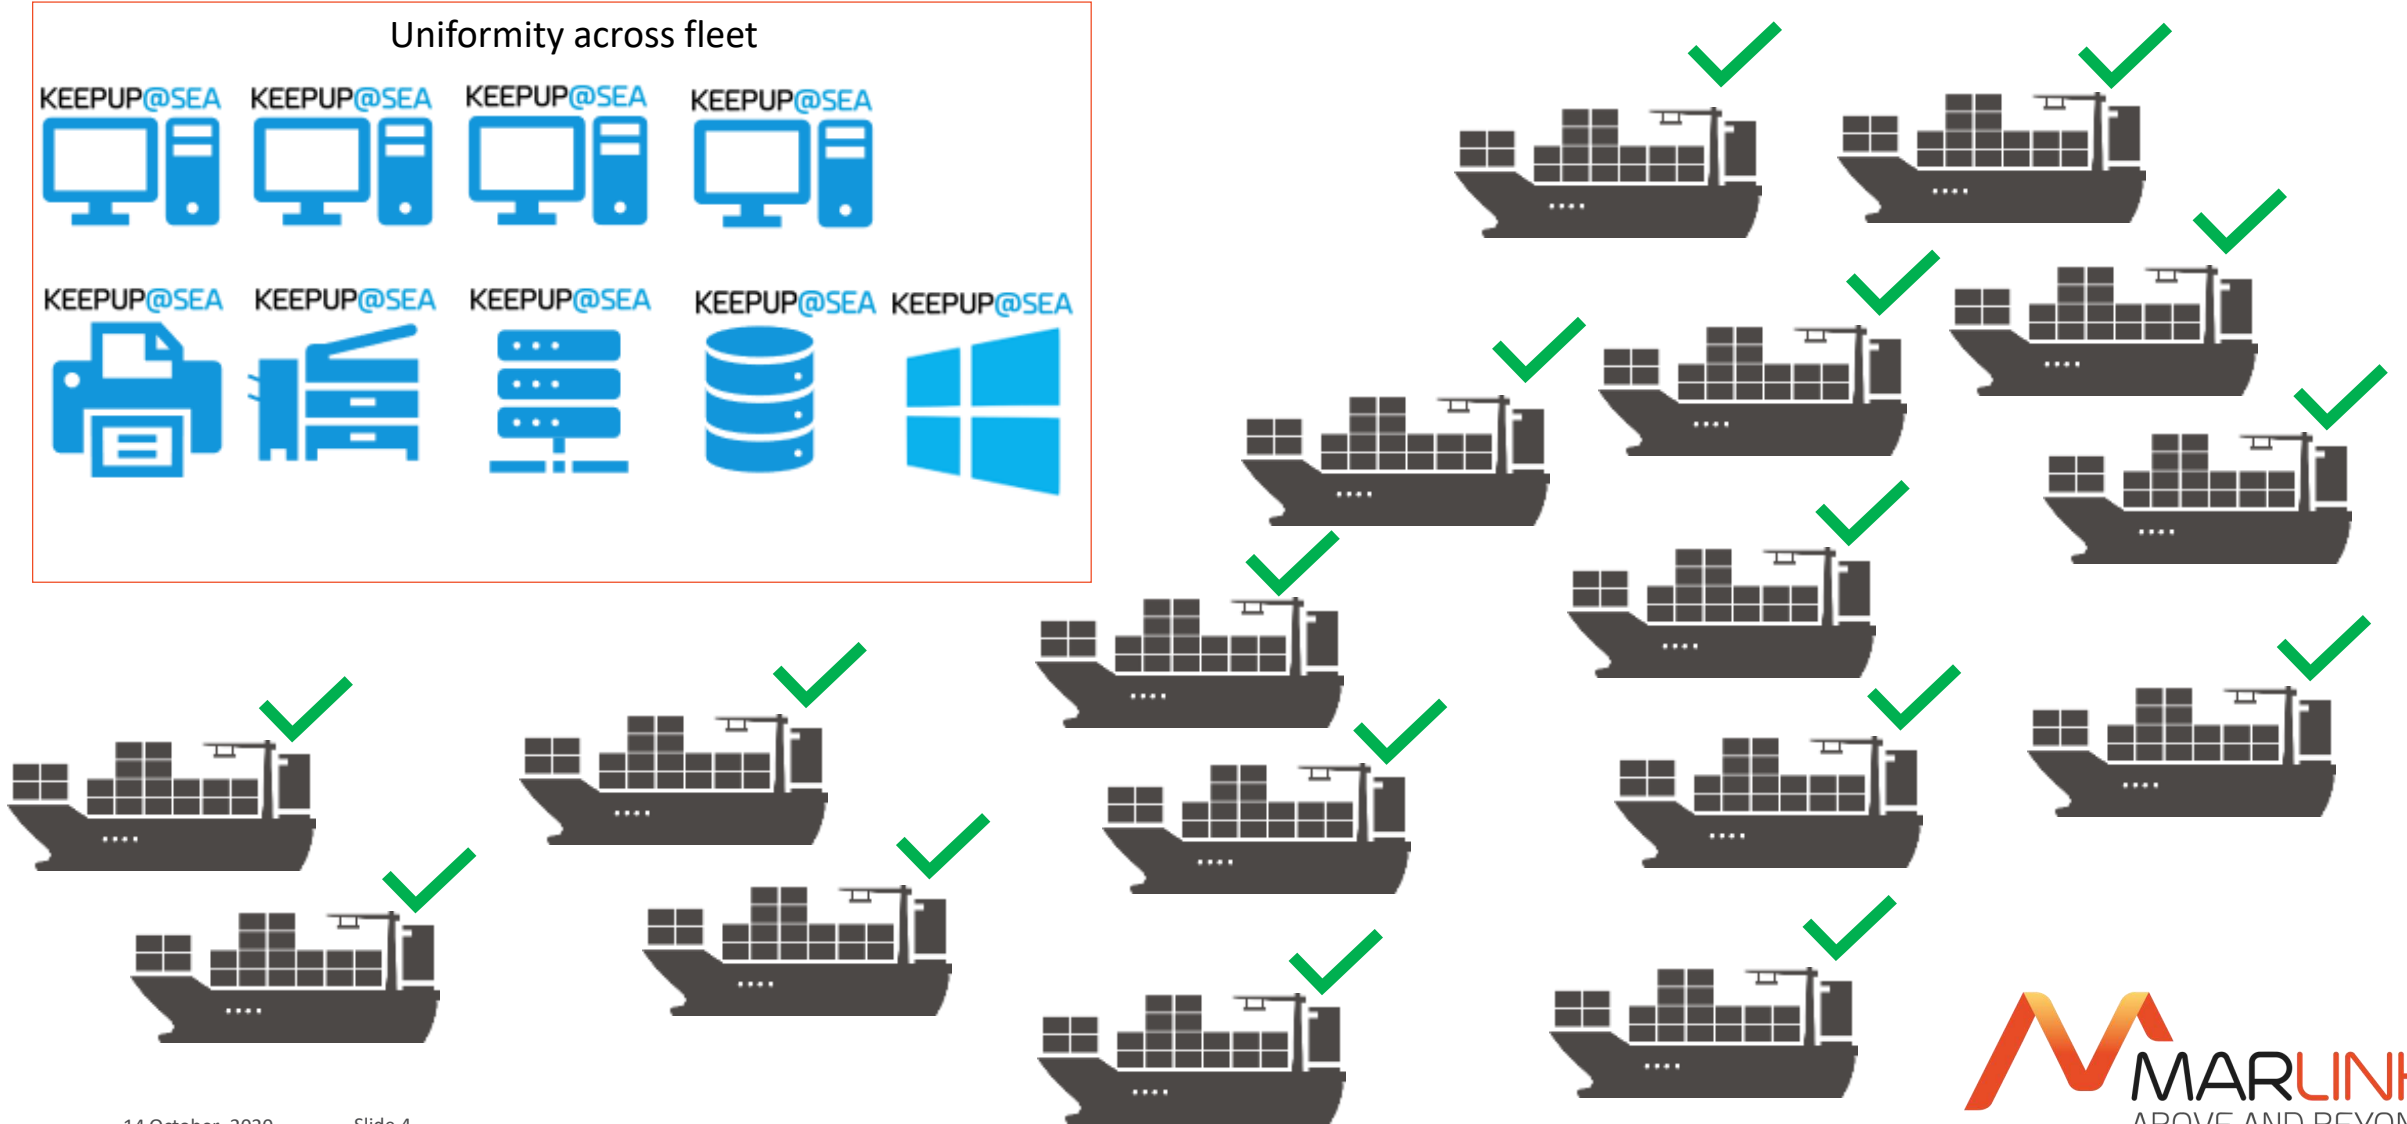

Most recently installed

KEEPUP@SEA

Uniformity across fleet

Thank You!
