

Food Retail CEO Forum 2019

Presentation:

“Connected Workforce”

Panos Mitsios

Co-Founder & COO at TEKMON

Digital Workspace

A digital workspace enables employees to access the systems and tools they need from any device - smartphone, tablet, laptop, or desktop- regardless of location.

Digital Workspace

However, the digital workspace is about more than simply enabling employees to work remotely. It's the capstone of a business mobility trend that has evolved from individual and team productivity to true business process transformation and that is reinventing businesses across all industries.

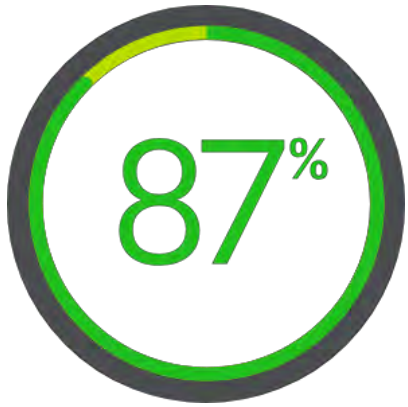

96% of organizations say digital workspaces help employees solve problems more creatively.

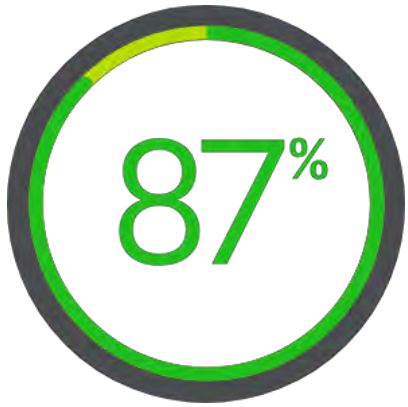

96% of organizations say digital workspaces help employees solve problems more creatively.

87% of organizations say digital workspaces help them provide better customer support.

Complicated Solutions

TEKMON

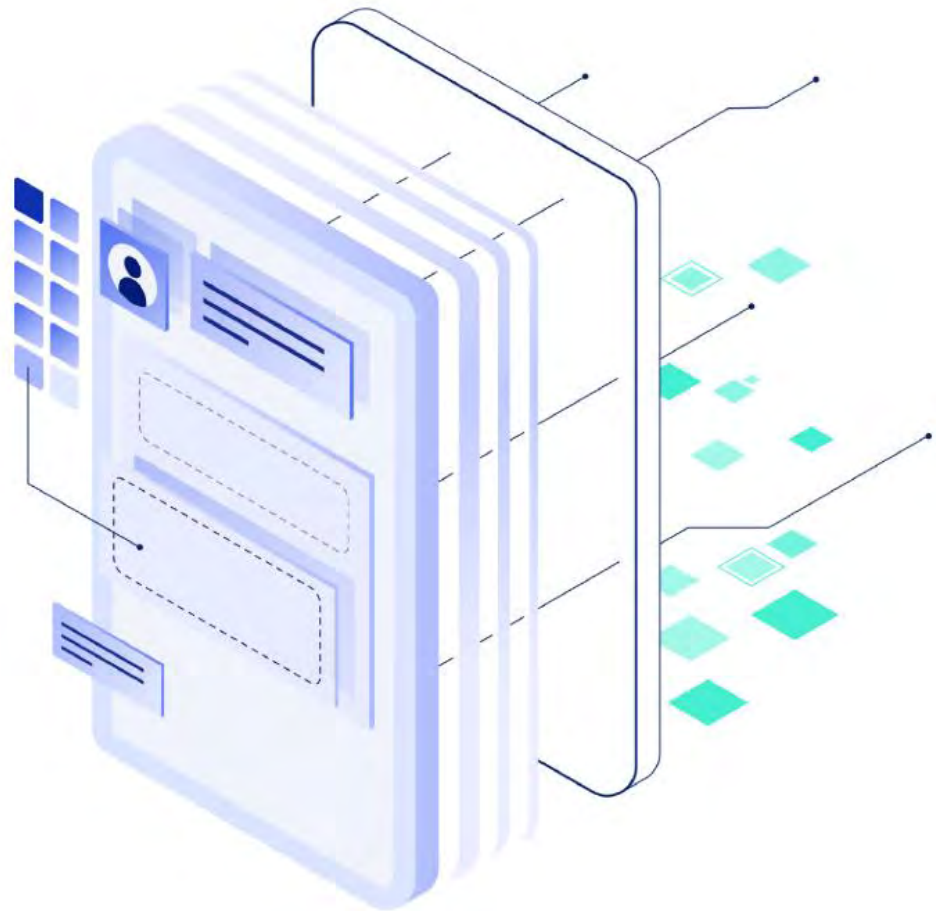

We believe that
frontline non desk
teams can work
smarter and more
efficient.

1. Digitization of working environment

The screenshot displays the TEKMON software interface. At the top, a dark navigation bar contains the logo and menu items: Topics, Tasks, Forms, Tools, Reports, and Settings. Below this, a secondary navigation bar highlights the 'Locations' section among other options like Assets, Parts, Products, Meters, Documents, and Companies. The main interface features a sidebar on the left with a 'Filters' section containing a table of location data. The central area is dominated by a map of Athens, Greece, with several location markers placed across the city. At the top right of the map area, there are controls for 'List View' and 'Map View', a search bar labeled 'Search for Location', and buttons for 'Actions' and 'New Location'. At the bottom left, there is a pagination control showing page 1 of 4.
